

BASSAM ALGHAMDI

Automation Engineer

Saudi Arabia | bassam.ghk@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | +966 55 786 5095

SUMMARY

Computer Science graduate and **Automation Engineer** proficient in **Python**, **OTA deployments**, and full-stack development using **React** and **Django**. Experienced in building intelligent solutions, from AI-integrated platforms to automated **ETL pipelines** and **IoT data analysis**. Driven by continuous learning and innovation, specialize in bridging AI insights with scalable applications to drive real-world stability and operational efficiency in collaborative environments.

EXPERIENCE

Dew Software (Seconded to Lucid Motors) – Jeddah, Saudi Arabia Apr 2026 - Present

OTA Automation Engineer

- Executed and monitored Over-the-Air (OTA) software deployments using **Jenkins** to ensure seamless fleet-wide updates.
- configuration of 15+ Electronic Control Units (**ECUs**) including VCU, TCU, and BCM to maintain vehicle system integrity.
- Conducted advanced vehicle diagnostics and system calibrations, including **DTC clearing** and **DID commanding**.
- Verified vehicle power states and network protocols to achieve a **100% success rate** for firmware updates.
- Analyzed** vehicle telemetry and configuration datasets to refine deployment workflows and improve overall system stability.

SGS - Saudi Ground Services – Jeddah, Saudi Arabia

Dec 2025 - Apr 2026

IT Specialist (Tamheer)

- Engineered** fully automated ETL pipelines using **Power Automate** and SharePoint to enable 100% hands-free daily reporting.
- Integrated and **analyzed** WakeCap IoT data with attendance logs to improve workforce productivity and safety insights.
- Developed scalable data models and complex **DAX** measures to monitor Undelivered Hours and operational performance gaps.
- Optimized **dashboard** performance by implementing Incremental Refresh and advanced data-shaping for large-scale datasets.
- Monitored** real-time hardware health (battery and connectivity) to ensure continuous operational readiness and safety.

Saudi National Bank (SNB) – Jeddah, Saudi Arabia

Jun 2025 - Jul 2025

AI & User Interface Developer Intern

- Created a functional AI-integrated chatbot interface prototype.
- Optimized frontend and API handling, boosting UI response time by 20%.
- Liaised with innovative teams to align UI/UX with AI model responses and business need.
- Structured internal datasets for AI workflows and supported 3 side projects, enhancing documentation.

EDUCATION

Saudi Digital Academy × General Assembly, Software Engineering Bootcamp

Nov 2025

Completed an intensive, **480-hour**, full-time program focused on full-stack development, **Agile workflows**, and modern software engineering.

Bachelor of Computer Science

Jan 2025

College of Computer Science and Engineering | University of Jeddah

PROJECTS

Inventory & Order Management System | Capstone

Nov 2025

- Built a full-stack web platform using Django **REST Framework** (backend) and **React** (frontend).
- Delivered 25+ **REST API endpoints** and an authenticated admin dashboard with real-time stock tracking.
- Optimized database queries and deployed via **Docker**.

Bank Management System | Python OOP Project

Sep 2025

- Designed a banking system using Object-Oriented Programming (OOP) principles (encapsulation, inheritance).**
- Enabled account handling, deposits, transfers, and implemented **overdraft protection** with dynamic fees.
- Wrote comprehensive **unit tests** (using Python's unittest) for core functionalities.

Speak Easy – VR English Learning Platform | Graduation Project

Jan 2025

- Developed a VR language learning tool with real-time AI conversational feedback.
- Integrated a **Flask backend**, **React frontend**, and **NoSQL database** for scalability.
- Designed the UI/UX in Figma which boosted engagement by 30% in trials.

PROFESSIONAL DEVELOPMENTS

- Certified Data Management Professional (CDMP) | DAMA International
- Data Analyst in Power BI | DataCamp
- Associate Data Analyst in SQL | DataCamp
- Introduction to Artificial Intelligence | KAUST Academy (in-person for 5 days)
- Generative AI with LLMs | Coursera & AWS
- Red Hat System Administration I (RH124)

SKILLS

- Technical Skills:** Python, JavaScript, PostgreSQL, Django, React.js, Flask, Firebase.
- Tools:** Power BI, Excel, Microsoft, Figma, JIRA, Git, Docker, Lucid Release Station, Jenkins, CI/CD Pipelines,.
- Soft Skills:** Problem Solving, Analytical Thinking, Teamwork, Collaboration, Accountability, Time Management, Continuous Learning.
- Languages:** Arabic (Native), English.
